China Chamber of Commerce for Import and Export of Machinery and Electronic Products (CCCME) released its analysis of China's photovoltaic ...

In conclusion, China's solar module exports in 2025 tell a story of adaptation and enduring strength. Despite internal and external pressures to manage oversupply, the industry ...

In this article, we present the official BNEF Tier 1 list Q4 2025, sorted by annual production capacity (MW/year), with the aim of making it easier ...

EIA projects that PV's growth in 2023 (27 GWac) and 2024 (36 GWac) will continue in 2025 (39 GWac) and remain at similar levels in 2026 (36 GWac). In 2024, 24 states and territories ...

Between 2025 and 2029, global solar photovoltaic capacity additions are projected to increase yearly and range from some 655 gigawatts in ...

China's total module exports from January to September 2025 reached 206 GW, up 10% YoY from 187 GW. In September 2025, the top five single-country importers of Chinese modules ...

The continued low module prices associated with current over-capacity in manufacturing, combined with continued support mechanisms and rising demand across the world for PV PPAs has meant that PV ...

Module prices have declined by 12% year-over-year, on average, across all segments. This dip was driven by the expansion of manufacturing capacity and higher module power output as ...

Global Manufacturing The United States manufactured approximately 15.7 GWdc of PV panels in H1 2025, up 126%, y/y, and 440% over the past two years. In Q3 and early Q4 2025, domestic ...

China's PV exports totaled \$22.05 billion in 9M 2025, but reflected a slower decline and rising shipment

2025 PV Module Exports

volumes, the CPIA notes. Its exports of ...
