Thermal energy storage based on phase change materials (PCMs) can improve the efficiency of energy utilization by eliminating the mismatch between energy supply and demand.

Recognizing that energy storage safety requires systemic collaboration, Desay Battery brought together industry experts at the event to explore the future of storage technologies, value-chain integration, ...

Solar & Storage Ethiopia 2026 will make its first ever debut in Ethiopia on February 27, 2026, at Sapphire Addis Hotel, Addis Ababa. The event will serve as Ethiopia's first dedicated ...

The future role of natural gas in Ethiopia's energy mix will depend on the feasibility of new extraction and distribution projects, alongside economic and geopolitical considerations.

With 65% of its population lacking reliable electricity access, this project combines cutting-edge battery storage systems with solar farms to stabilize the national grid.

phased, inclusive, and sustainable energy transition, aimed at expanding access, diversifying energy sources, and strengthening financial and institutional resilience. This Compact adopts a holistic and ...

Summary: This article explores the pricing, market trends, and real-world applications of phase change energy storage (PCES) systems in Addis Ababa. Discover how this technology supports Ethiopia's ...

This article explores how cutting-edge battery storage systems stabilize grids, integrate renewables, and support sustainable development - with actionable insights for policymakers and energy professionals.

This article cuts through the noise to deliver actionable insights about Ethiopia's flagship energy initiative while exploring broader trends in battery storage solutions.

Addis ababa new energy phase change energy storage

Addis Ababa, Ethiopia's bustling capital, has recently introduced mandatory energy storage requirements for photovoltaic (PV) projects. This policy aims to stabilize the city's power grid.
