In 2024, between 554 GWdc and 602 GWdc of PV were added globally, bringing the cumulative installed capacity to 2.2 TWdc. China continued to dominate the global market, ...

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the ...

The report is part of IEA-PVPS Task 1, which focuses on the technical, economic, and social aspects of PV power systems.

With forecasts up to 2029 and a spotlight on India -- now the world's third-largest solar market -- the report outlines critical challenges and solutions for sustaining growth, from policy ...

The current trajectory of the Solar PV panels market reflects structural transformation driven by rapid deployment, supply-chain dynamics, ...

The solar PV market in the North America is expected to grow significantly over the forecast period, owing to its rapidly expanding solar energy landscape driven by ...

The solar photovoltaic market size crossed USD 323.5 billion in 2025 and is expected to grow at a CAGR of 8.1% from 2026 to 2035, driven by integration of ...

The IEA PVPS Trends in Photovoltaic Applications 2025 report provides comprehensive data and analysis on global PV deployment, technology, and ...

Despite the changing market and policy conditions that the solar industry has faced this year, solar will remain the dominant power source added to the grid in the next five years.

Analysis of the current status of photovoltaic grid panel industry

The Solar Energy Market Report 2025 provides firmographic, innovation, and investment data to outline the current state of the solar industry. ...
