-----

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

In 2019, approximately 2% of the world's energy was generated by solar power, but that portion is increasing exponentially each year. This global solar energy ...

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the ...

From rooftop installations to large solar farms, solar energy systems are growing rapidly worldwide, revolutionizing the way we produce, distribute, ...

Energy Digital has ranked 10 of the largest renewable energy projects. Before the year 2030, more than half of the world's electricity will come ...

U.S. power plant developers and operators plan to add 86 gigawatts (GW) of new utility-scale electric generating capacity to the U.S. power grid in 2026 in our latest Preliminary Monthly ...

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

Talatan Solar Park (in Gonghe County, Qinghai, China) is the largest ...

Discover the world's largest solar farms in 2025. Complete rankings, capacity data, locations, and analysis of mega solar projects transforming global energy.

About this data Total solar capacity Total solar (on- and off-grid) electricity installed capacity, measured in gigawatts. This includes solar ...
