Ampt and Hiringa Energy plan to deploy a 27 MW (DC) solar array with 30 MWh battery storage to power green hydrogen and ammonia production for a low-carbon cotton operation in ...

The objective of this study is to demonstrate the unpredictability of renewable energy sources like solar and wind to calculate the amount of hydrogen energy storage (HES) that would be ...

The Australian Government has released its 2024 National Hydrogen Strategy. The strategy provides the framework to guide Australia's production, use and export of hydrogen.

H2G proudly unveils its new residential battery and solar platform, engineered for Australian homes with four core pillars: 100% fire-safe, best affordability, 20 year longevity, and sustainability.

As the global push for decarbonisation accelerates, solar and hydrogen are emerging as a powerful duo in Australia's clean energy transition. When paired ...

Storage infrastructure is essential to enable hydrogen to be produced and stored during periods of low demand, then supplied during periods of high consumption. Small quantities of ...

The market is driven by growing investments in renewable energy, government support for decarbonization, and the country's potential as a hydrogen exporter. ...

Renewable storage technologies have the potential to revolutionise clean and reliable energy access in remote communities, support cost-effective ...

In Australia, ENGIE is developing its future energy portfolio. With a mix of renewable and non-renewable energy, we aim to generate more than 2,000 ...
