Scientists developed a reusable liquid that captures and stores solar energy as heat, offering a battery-free alternative for heating and more.

Renewable energy in Belarus is not just about environmental benefits; it also aims to enhance energy security, create jobs, and foster technological innovation.

The brief duration of sunshine and high share of scattered solar radiation in Belarus and Tatarstan make solar thermal power generation technologies extremely ineffective.

Belarus is gradually supporting renewable energy growth: Belarus may not be the sunniest country in Europe, but its moderate solar potential -- combined with growing interest in energy security and ...

Our analysts track relevant industries related to the Belarus Solar Thermal Market, allowing our clients with actionable intelligence and reliable forecasts tailored to emerging regional needs.

Surpassing even its primary energy supply, Belarus's energy imports (31 Mtoe p.a.) are used to fuel a large, export-oriented refining industry. Due to current sanctions, these exports have been shifted ...

Belarus's 2025 focus on small-scale solar installations and wind power repairs marks a significant step toward a more sustainable and diversified energy future. While challenges remain, ...

As of 2021 there is little use of solar power in Belarus but much potential as part of the expansion of renewable energy in Belarus, as the country has few fossil fuel resources and imports much of its ...

Belarus's geothermal potential is relatively undiscovered, with only a few regions having been tested. Of the tested regions, the most promising geothermal energy potential lies in the Pripyat Trough (Gomel ...
