In the last five years, Brazil has increased its solar photovoltaic energy generating capacity by more than 6-fold. In 2020, the country's installed ...

One of the most important regulatory issues in Brazil's 2025 Agenda is the restriction of solar and wind plant energy due to the lack of capacity of the transmission systems and the supply of ...

Renewables curtailment in Brazil in the first half of 2025 is straining investment and highlighting grid and transmission limits, with analysts calling for ...

In 2024, solar power, when including distributed generation, became the second largest source of electricity in Brazil, surpassing wind power, and reaching almost 50 GW. Utility scale solar ...

BOGOTA, Colombia (AP) -- Wind and solar power generated more than a third of Brazil's electricity in August, the first month on record the two renewable sources have crossed that ...

Distributed solar generation capacity grew from less than 1 gigawatt (GW) in 2018 to 40 GW in 2025 through June, accounting for 43% of all electricity capacity additions over that period.

Post-2010, inconsistent hydropower outputs continued, with substantial declines in 2013, 2014, and 2021. Nevertheless, Brazil has increasingly turned towards wind and solar advancements, with ...

Brazil has achieved a remarkable milestone in August 2025. For the first time ever, wind and solar energy together generated more than one-third of the country's ...
