It is now (since 2013) possible to build a flywheel storage system that loses just 5 percent of the energy stored in it, per day (i.e. the self-discharge rate).

With a comprehensive review of the BESS grid application and integration, this work introduces a new perspective on analyzing the duty cycle of BESS applications, which enhances ...

The increased interest in the renewables sector has also been fuelled by the launch of the first auction procedures in Bulgaria to support renewable projects co-located with storage ...

Today, modular lithium-based energy storage systems have become the preferred solution for ensuring continuous operation, even under unstable ...

Are you looking for information on renewable energy in Bulgaria? In this CMS Expert Guide, we tell you everything about it.

The selected storage systems will be geographically distributed across Bulgaria and connected either to the national transmission grid or local distribution networks.

The one-stop energy storage system for communication base stations is specially designed for base station energy storage. Users can use the energy storage ...

Getting inverter-grid integration right isn't just about compliance - it's about unlocking Bulgaria's full solar potential. With the right approach, your solar project could outlast the Boyana Church frescoes!
