How to Use Solar Panels Directly Without Battery Do I Need Battery For My Solar System? Is It Okay to Use Solar Panels Without Battery Storage? Frequently Asked Questions Can I use solar panels and inverters without battery? Yes, if you are connected to an electrical grid, you can use solar panels and inverters without battery storage. However, it's important to note that grid-tied solar systems are usually shutoff during power outages to prevent the backflow of electricity from harming utility workers. A few inverter manufacturer... How does solar work without batteries? Without battery storage, solar systems typically use the utility grid as a battery. Solar energy is first used to directly power your home and the excess energy is pushed onto the local grid to power neighboring systems. When the solar system is underproducing, the home draws electricity from the lo...
