-----

Norwegian power producer Statkraft has launched construction of its 20-MW/100-MWh Cardonal battery energy storage system (BESS) at a site in central Chile, it said today in a brief ...

Both located in the heart of the Atacama Desert, the two facilities together will reach a total capacity of 452 MWp and a storage capacity of 2.5 ...

Chile's first battery energy storage projects were commissioned in 2009, and all but two of its 16 administrative ...

Ensuring projects are paid for injecting power into the grid during peak periods has supported growth, and ambitious battery energy storage system (BESS) targets are now being ...

Acciona Energia's decision to retrofit their Chilean solar plant with a massive 1GWh battery system isn't just another project announcement--it's a glimpse into how rapidly the energy ...

Solar power combined with battery energy storage is at the forefront of Chile's recent generation growth.

Located on the site of the former Tocopilla coal-fired power plant, the project represents Engie's first large-scale standalone battery storage facility in Chile.

With a storage capacity ranging from 4 to 5 hours, these systems provide a versatile and efficient solution for the electrical grid. Thanks to their duration ...

Think of this 2,036 MWh battery like a massive, four-hour energy reservoir. It captures the solar energy "rain" during the ...

Chile has taken a bold step toward a sustainable future with the completion of its latest energy storage power station. This project, one of the largest in South America, combines cutting-edge battery ...
