Superstation (alternatively rendered as "super station" or informally as "SuperStation") is a term in North American broadcasting that has several meanings.

In this article, we aim to develop a novel super base station (SupBS) network architecture to tackle these issues. The proposed SupBS architecture consists of two layers, namely, an infrastructure layer and ...

Simply put, a base station (BS) is a wireless transceiver device in a mobile communication network that provides wireless coverage and ...

A super base station based centralized network architecture for 5G mobile communication systems

To cope with the problem of no or difficult grid access for base stations, and in line with the policy trend of energy saving and emission reduction, Huijue Group has launched an innovative base station ...

In this paper, a centralized radio access network architecture, referred to as the super base station (super BS), is proposed, as a possible solution for an energy-efficient fifth-generation (5G) mobile ...

mobile communication networks and the traditional virtual machine migration in computer networks. The main idea is to logically separate the processing task and data context during the resource...

These base stations are pivotal in delivering the high-speed, low-latency connectivity that 5G promises. A 5G base station is a critical component ...
