---

The lithium-ion battery market size crossed USD 75.2 billion in 2024 and is expected to grow at a CAGR of 15.8% from 2025 to 2034, driven by the shift to ...

This review explores the current state, challenges, and future trajectory of lithium-ion battery technology, emphasizing its role in addressing global energy demands and advancing ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest ...

Annual battery storage installations hit 18 GW in 2023 globally US cumulative battery storage reached 15.4 GW by end-2023 China added 19.43 GW of battery storage in 2023 alone ...

Governments are boosting policy support for battery storage with more targets, financial subsidies and reforms to improve market access. Global investment in EV batteries has surged eightfold since 2018 ...

Find up-to-date statistics and facts on lithium-ion batteries.

To define, describe, and forecast the battery energy storage system (BESS) market in terms of battery type, energy capacity, ownership, connection type, ...

The lithium industry is riding a wave of excitement over demand for large-scale battery storage, overshadowing the supply-side anxiety in China that has recently roiled the market.

In recent years, the energy storage battery export sector has emerged as a critical pillar of the global renewable energy transition. This article analyzes key market trends, regional demand hotspots, and ...
