Outside of North America, the South American energy storage market is growing at an impressive rate. More and more companies are looking at South America and harvesting fruit quickly.

As countries in South America strive to diminish their dependence on fossil fuels and improve the reliability of their electrical grids, energy storage ...

Standalone utility-scale projects are providing grid stability across Central America and the Caribbean, while high solar penetration is driving solar-paired projects in Mexico and South ...

A new report forecasts that Chile will lead the region in energy storage capacity, followed by Mexico and the Dominican Republic - driven by supportive regulatory frameworks and the growing adoption of ...

South America's energy transition requires substantial investments in storage, back-up capacity and new grid infrastructure to manage variability and maintain reliability.

South America is the continent most dependent on renewable energy, but it is a market that has been difficult for the energy storage industry to ...

This year, we have added flagship projects such as the Desierto BESS (200 MW and 800 MWh of storage) and Estepa (both phases), with 215 ...

The opportunities for battery energy storage systems are growing rapidly in Latin America. Below are some key details for those who want to understand and succeed in the BESS ...

This publication examines the current and potential future roles for various energy storage technologies in LAC grids. It describes the main energy storage technologies being used internationally and the ...

Energy storage projects already operating in South America

With 23 energy storage projects already approved, totaling an impressive 3,000 MW of capacity, Chile is at the forefront of innovation and efficiency in Latin ...
