---

With over &#163;20 billion of battery energy storage projects in planning, and Clean Power 2030 calling for 23-27 GW by decade's end, the pressure to deliver is ...

Ofgem has confirmed that 77 LDES projects, totalling 28.7 GW, have passed the first eligibility stage under its new cap and floor scheme. Of these, 71 ...

Britain will only make effective use of its energy potential if grid-scale energy storage keeps pace with the expansion of new windfarms and other ...

There has been a shift in the pipeline for current and future long duration electricity storage (LDES), from over 7.2GW in December 2023 to ...

The map features a range of projects supported by government since July 2024. The supporting documents provide more detail on the methodology and the sources of data.

There will be a potential surge in battery energy storage system (BESS) projects receiving grid connection offers before 2030 following ...

In this blog, we'll explore the top 7 battery energy storage system projects in the UK for 2025. We'll look at each project's capacity, project cost, current status, and how it supports the broader shift to clean ...

The UK has filtered out its grid connection queue as its National Energy System Operator (NESO) confirmed today a reordered pipeline of 283 ...

Over 43GWh was approved in 2024, an increase of 35% from 2023 and this year has already seen over 8.9GWh of approvals, including one of the ...

# Energy storage ratio of UK new energy projects

This paper explores how the requirement for energy storage capacity will grow as the penetration of renewables increases. The UK's electric grid is used as a case study. The paper aims ...
