European Energy aims to reach final investment decisions (FIDs) on 3 GW of solar, onshore wind, and battery storage capacity over 2026, executive VP and head of development Thorvald Spanggaard ...

Wind and solar power produced more electricity than fossil fuels in the EU for the first time last year, data published on Thursday showed, indicating the bloc's continued shift towards...

By supporting battery innovation, hydrogen storage, and smart grid infrastructure, the EU is building a robust, resilient energy ecosystem aligned with its clean energy and climate neutrality goals.

Over 21 GW of renewable capacity will be auctioned across Europe in what remains of 2025, covering offshore wind, onshore wind, solar PV, ...

A new report from energy think tank Ember has found that renewable energy produced almost half of EU power last year, despite a drop in ...

European Energy has secured EUR 37.9 million of long-term project financing for a hybrid solar and battery storage project in Saldus, Latvia. Once operational, it will be among the most ...

Abstract The study offers an in-depth examination of the capabilities and output of renewable energy sources, specifically focusing on solar, wind, hydroelectric, and green hydrogen ...

Explore Europe's 2024 solar boom, with gigawatt-scale projects in Germany, Spain, and beyond driving a historic shift in the continent's energy landscape.

Signs of a structural shift are clear across the EU, as wind and solar generated more electricity than all fossil sources in 14 of the 27 EU countries in 2025. Over the past five years, wind ...

European wind solar and energy storage power generation projects

In this blog, we have covered the upcoming renewable energy projects such as Sylen offshore wind power plant, Dogger Bank windfarm, Zaragoza & Teruel ...
