Aarhus Universitet står i spidsen for et nyt forskningsprojekt, der har til formål at udvikle en ny type flowbatterier. Batterierne, der er baseret på kobber, er en bæredygtig, sikker og billig ...

This technology strategy assessment on flow batteries, released as part of the Long-Duration Storage Shot, contains the findings from the Storage Innovations (SI) 2030 strategic initiative.

The fundamental difference between conventional and flow batteries is that energy is stored in the electrode material in conventional batteries, while in flow ...

Long-duration energy storage solutions provider Sinergy Flow has closed a late-seed funding round, raising EUR 7 million (USD 8.25m) to expand its team and advance the development ...

Flow Batteries Europe is working to create and reinforce networks between key stakeholders in the flow battery industry. Become a member of Flow Batteries Europe and play an active role shaping a long ...

What is a flow battery made of? Who makes flow batteries? Check out our blog to learn more about our top 10 picks for flow battery companies.

Deep insights into the future of battery storage and redox flow technology. The world is changing -- and so is the way we store energy. At FlowCharge, we're here to shine a light on one of the most exciting ...

A broad consortium has received EUR22 million in funding from the Dutch National Growth Fund for the so-called SLDBatt project (Sustainable Long Duration Battery), which focuses on long ...
