-----

Alphabet's Google doubled down on efforts to secure power supply for its data centers across the country by entering into separate agreements with U.S. utilities, AES Corp and Xcel ...

Form Energy invented a novel iron-air battery to store clean energy for much longer timeframes than conventional lithium-ion batteries can. The startup is still constructing its first ...

Google plans to deploy a 300 MW/30 GWh iron-air battery system in Minnesota under an agreement with Xcel Energy, pairing it with 1.6 GW of new wind and solar.

WEIRTON -- A Minnesota-based Google data center will have some backup from a local source. According to officials, Form Energy will deploy a 300-megawatt and 30 gigawatt-hour multi ...

The 300 MW / 30 GWh multi-day storage system from Form Energy will be paired with 1.6 GW of new renewables to facilitate Google's 24/7 carbon-free energy goals.

Google announced Tuesday that it will build a data center in Minnesota that's backed by 1.9 gigawatts of clean power, including a massive 300-megawatt battery made by startup Form ...

Broadwing Energy, located in Decatur, Illinois, will capture and permanently store approximately 90% of its CO2 emissions. By agreeing to buy ...

Google's new Minnesota data center deal includes 1.9 GW of wind, solar, and an iron-air battery, the largest ever system by energy capacity.

Google announced this week it's developing a new data center complex south of Minneapolis to be powered by a practical utopia of clean energy: lots of wind, solar, and, notably, the ...

The tech giant's latest project pairs massive renewable energy capacity with a 100-hour battery to support data
