Experts have called India a hedge against AI - reflecting the absence of Indian companies in the global boom.

Home to 1.5 billion people and the fastest-growing of the large economies, India is an appealing venue for the world's exuberant A.I. investors and engineers. While investors see ...

The India AI Impact Summit is a major tech event in the country and drew a host of prominent tech and world leaders to New Delhi. U.S. tech companies made moves to deepen ...

India is fast becoming one of the world's biggest AI user bases. The question now is how it can turn that scale into superpower status rather than just training Silicon Valley for free. ...

An interview with Amazon's AI chief Peter DeSantis on plans to use in-house chips, Trainium and Inferentia, to develop AI models more cheaply, and more Bloomberg:

India's AI adoption figures are high, but the country faces challenges in moving from being a consumer to a producer of AI, including finding land, water, and electricity for ...
