Unpack it using 7z. If that does not work, it's likely corrupted, and you need to re-make it and re-transmit it. 7z may use exotic compression not supported by all zip software.

I received a huge .tar.gz file from a client that contains about 800 mb of image files (when uncompressed.) Our hosting company's ftp is seriously slow, so extracting all the files locally and ...

I have an Ubuntu installation backed up as a .squashfs file. I would like to extract it to the root of a partition, but when I try gives me an error saying the ...

When I try to update the system(`sudo apt-get update`) or install something (`sudo apt-get install ...`) it returns the following error : `dpkg: error processing archive ...`

I have not tried to rebuild this sort of `initrd.img` file myself, but based on that Wiki page it seems that to edit the `initramfs` boot scripts, one would not want to unpack the GenuineIntel archive ...
