Solar technology isn't new. Its history spans from the 7th Century B.C. to today. We started out concentrating the sun's heat with glass and mirrors to light fires. Today, we have everything from ...

Solar panels are the future of energy, but where did they come from? We looked at the last 200 years of solar invention and discovery to find out.

Discover the fascinating 180-year history of solar panel invention and the broader history of solar energy, from Edmond Becquerel's 1839 ...

Charles Fritts installed the first solar panels on New York City rooftop in 1884. Courtesy of John Perlin. Take a light step back to 1883 when New York inventor ...

The evolution of solar is a long story that hasn't come close to finishing. Here's how solar panels have changed and evolved over the years.

The birth of photovoltaics, the development of the first solar cells, ...

How did it all start? Who invented solar panels? Dive into this post to find out more about the history and creation of solar panels.

A solar panel is a device that converts sunlight into electricity by using multiple solar modules that consist of photovoltaic (PV) cells. PV cells are made of materials ...

In 1839, Becquerel was the first person to discover the photovoltaic effect, the phenomenon where sunlight is converted into electricity. This ...
