Throughout 2022, a shortage of solar panels in the US has caused many solar developers to face increased delays in getting their projects into service. Delays are not a new ...

The US solar industry installed 11.7 GW of capacity in Q3 2025, the third largest quarter for deployment in the industry's history.

Go behind the scenes in a state-of-the-art solar panel factory, where raw silica is transformed into high-efficiency solar panels.

First Solar in late September opened a \$1.1 billion, 3.5-GW panel production hub in Alabama, pushing its domestic manufacturing footprint to nearly 11 GW -- more than all US module ...

China's solar manufacturers built new factories at a fever pitch between 2020 and 2023 as the state redirected resources from the sinking ...

The photovoltaic effect discovered in 1839 allows solar panels to transform sunlight into usable electricity. Warehouses and factories can run on solar power, providing numerous ...

Local news outlets are reporting that Meyer Burger has laid off employees at its solar panel assembly facility in Goodyear, Arizona. Worker ...

China's solar boom that went too far, too fast Walk through any major solar hub in China and the first thing you notice isn't noise. It's space. Huge sheds, bright white lights, conveyor belts ...

Solar panel giant Qcells is furloughing 1,000 workers in Georgia due to supply chain delays caused by US Customs.

NLR analyzes manufacturing costs associated with photovoltaic (PV) cell and module technologies and

solar-coupled energy storage technologies.
