Our integrated energy storage solution is designed to help commercial and industrial users lower electricity costs, enhance supply reliability, and improve power quality.

Our outdoor energy storage cabinet is an intelligent integrated management system that provides reliable and efficient energy storage for outdoor applications.

The energy storage system utilizes lithium iron phosphate batteries, which offer high energy density and long cycle life. The unit features an outdoor cabinet design, allowing for flexible expansion and ...

The liquid cooling battery cabinet is a distributed energy storage system for industrial and commercial applications. It can store electricity converted from ...

Our system is designed to enhance energy density and thermal performance, accelerate installation times, engineered for optimal serviceability, and ...

The "all-in-one" design integrates batteries, BMS, liquid cooling system, heat management system, fire protection system, and modular PCS into a safe, ...

One battery cabinet consisting of 10 packs with integrated air cooling and fire protection to ensure system safety, while the system can be freely expanded according to project requirements.

? Solar + Storage Ready - The cabinet seamlessly integrates with rooftop or ground-mounted PV systems, enabling: Maximum solar self-consumption Reduced grid export limitations Higher overall ...

Designed for multiple scenarios, they are ideal for urban buildings, communities, and low-voltage networks,

Liquid Cooling Outdoor Integrated Cabinet solar container energy storage system

featuring highly integrated liquid-cooled Commercial ...

100kW/215kWh outdoor integrated cabinet for industrial and commercial storage. Suitable for various industrial and commercial application scenarios such as industrial parks and commercial complexes, ...
