MESS provides a basic level of knowledge and hands-on training course covering monitoring, operation, maintenance and troubleshooting of the solar system.

Al-Sila Substation A key 400kV switching substation, Al-Silla connects the GCCIA grid with the UAE grid, enhancing the region's energy security and integration.

Containerised generator modules connected in parallel complete with sync panels, containerised substations, transformers & SCADA. Re-locatable within a short span of time.

Designed for Plug and play operations, the ZSC range of mobile solar power is easy to setup and commission. The compact container is easy to transport and is a low maintenance asset on site.

Integrating generators, solar, and batteries to reduce emissions. Reliable power in challenging and inaccessible locations. Sustainable, cost-effective systems for operational efficiency. End-to-end ...

Significant investment opportunities in the Middle East and Africa include large-scale solar container projects for industrial, commercial, and community applications.

Our made-to-order advanced solar substations solutions for solar farms withstand the harsh environmental conditions of deserts, all while handling variable generation, protecting critical ...

Emerging markets in Africa and Latin America are adopting mobile container solutions for rapid electrification, with typical payback periods of 3-5 years. Major projects now deploy clusters of 20+ ...

Our systems made to weather the harshest climates of the Middle East & Africa. They can take the desert heat, humidity and salt of the sea. We bring the power to you, no matter where your project ...

Middle East substation solar container system

MEOX solar containers use a modular solar design. Teams can add more solar units when they need extra energy. The solar containers are easy to move to new spots. Each one stores ...
