-----

Solar power generation is the predominant method of power generation on small spacecraft. As of 2021, over 90% of all ...

Discover New Use Energy's silent, rugged, and portable power systems built for the military. Our solar-powered generators offer a decisive advantage by eliminating fuel logistics and ...

Discover the 123-SGH-4 Tactical Solar Generator -- a high-performance, field-deployable power system designed for U.S. military operations.

Built for extreme conditions, our military-grade solar generators deliver rugged, reliable, and off-grid power. Waterproof, durable, and EMP-resistant, these high-performance solar solutions keep your ...

The garrison's solar array supports the U.S. Department of Defense's operational readiness and resilience goals by providing clean energy and stable electricity ...

It is a portable power generation system that incorporates solar panels, energy storage, the one-man portable generator, and alternating current (AC)/direct current (DC) power sources.

HONOLULU -- The U.S. military's longstanding goal to make weapon systems more energy efficient is growing increasingly complicated as ...

o An electrified tactical fleet will significantly change the power generation landscape -How are we going to do that?  
o Commercial open systems architecture vs. military unique requirements -When are we ...

The electrification of warfare is accelerating at an undeniable rate. To support the growth in emerging technologies and capabilities, the U.S. Army's electrical power systems require...
