The Namibia Power Corporation (NamPower) has opened the Initial Selection stage for the engineering, procurement, and construction ...

Namibia intends to solve these problems in the future with a "battery energy storage system" (BESS). This will collect the excess electricity produced during the day or which is available at ...

As Namibia's capital Windhoek embraces renewable energy, battery storage systems have become the cornerstone of sustainable power infrastructure. These solutions address three ...

On May 13, 2025, SunEvo successfully completed an off-grid energy storage project at a private conservation reserve in Namibia, providing stable power to support eco-tourism and wildlife ...

Key contracts have been signed for the first-ever grid-scale battery storage project in Namibia, signifying the African country's ...

Surplus electricity from RE generation as well as cheaper electricity imports from the Southern African Power Pool (SAPP) can be stored in the BESS. The stored energy could supply ...

NamPower will contribute approx. 100 million NAD to ensure the total project cost of around 500 m NAD are fully covered. The BESS plant will assist in ...

Let's cut to the chase: In December 2023, Windhoek made history by launching Namibia's first grid-scale energy storage system. This 54MWh project in Erongo Region isn't ...

Namibia is not yet self-sufficient, but the combination of grid-scale storage and transmission expansion is laying the foundation for a more resilient and renewable-driven ...

Namibia energy storage for backup power

In light of this situation, KfW offered to finance a Battery Energy Storage System (BESS) project to support the power grid. In this context, we ...
