-----

As Tesla's first energy storage gigafactory outside the United States, the new Lin-gang plant only took nine months from groundbreaking, which took place in May 2024, to official operation.

As of late February 2026, North Hillsboro has officially become the site of a one-gigawatt BESS "Battery City," a concentration of energy storage so massive it rivals the output of a nuclear ...

SHANGHAI, Feb. 11 -- U.S. carmaker Tesla's new Megafactory in Shanghai, dedicated to manufacturing its energy-storage batteries, known as Megapacks, launched production on Tuesday, marking a ...

Test item particulars: According to Unit Level of ANSI/CAN/UL 9540A:2019 Fourth Edition. Purpose of the product (description of intended use): Rechargeable Li-ion Battery System HV48100 BMU-8 uses ...

The January fire at one of the world's largest battery storage plants, the Vistra Energy lithium battery plant in northern California, highlighted safety ...

Let's catch up on what happened in this fire, what the lingering concerns are, and what comes next for the energy storage industry.

EXECUTIVE SUMMARY grid support, renewable energy integration, and backup power. However, they present significant fire and explosion hazards due to potential thermal runaway (TR) incidents,

On March 14, 2025, the energy sector received a jolt when a lithium-ion battery storage system at Jingyu Power Plant ignited, causing China's first major energy storage explosion of the decade.

More battery energy storage facilities are needed around the world, but fire risks remain.
