Electric vehicles may soon have a new power source: sodium-ion batteries. Chinese automaker Changan Automotive plans to launch what it says will be the first mass-produced ...

American battery startup Peak Energy and energy developer Jupiter Power have teamed up to deploy grid-scale sodium-ion batteries. It's a big step forward for the nascent--and in some ways,...

A new sodium-ion battery offers a cheaper and safer alternative to conventional lithium-ion systems, scientists say, paving the way for more ...

CATL has introduced sodium-ion batteries with a potential cost reduction to \$10/kWh, using sodium's abundance and safety to address energy ...

Until now, new battery types such as sodium-ion batteries have often been seen in politics and media as an opportunity to quickly catch up on technological backlogs compared to market ...

Naxtra, the world's first mass-producible sodium-ion battery, breaks resource constraints and strengthens the foundation of the new energy industry. ...

A surprising breakthrough could help sodium-ion batteries rival lithium--and even turn seawater into drinking water.

Leading global battery maker CATL and Changan Automobile unveiled the world's first passenger EV powered by a sodium-ion battery on Thursday.

The world's leading EV battery producer has just unveiled a new sodium-ion battery to reshape the industry.

In order to maintain steady factory utilization, battery companies are shifting to the most abundant low-cost materials, with sodium-ion batteries to increase volume and further lower battery...
