This study provides some useful recommendations for decision-makers regarding the development and deployment of PV energy technology in the country in order to achieve sustainable development goals.

This paper presents an overview of the current status of solar energy deployment in Cyprus, including solar thermal systems, photovoltaic (PV) installations, renewable energy mix, grid ...

Sun-drenched Cyprus imports most of its energy, but this is unnecessary: Cyprus has the highest solar power potential in the European Union. Local engineers and researchers, together with energy ...

The study aims to reveal the prominent strategic energy alternatives for Northern Cyprus (NC) in its aspiration to transition from fossil fuels to solar energy/clean energy/renewable energy ...

This study provides some useful recommendations for decision-makers regarding the development and deployment of PV energy technology in the country in order to achieve sustainable ...

The present paper aims to encourage people and the government to develop solar energy-based power projects to achieve sustainable energy ...

The primary objective of the current study is to optimize an FPV at Near East University Lake in Northern Cyprus, aiming to enhance energy production and mitigate negative environmental impacts.

Abstract le fix-tilt solar installations to support the country's energy independence. Despite over 3,300 sunlight hours annually, Cyprus underutilizes its solar energy address this gap, the thesis applies a ...

Examining the feasibility of using solar energy in Northern Cyprus, as is done in this study, is a necessary first step for a PV project. Moreover, the meteorological parameters (global ...
