By default, `now()` function returns output in the `YYYY-MM-DD HH:MM:SS:MS` format. Use the below sample script to get the current date and time in a Python script and print results on the screen.

How can I download .vsix files now that the Visual Studio Code Marketplace no longer supplies them in-browser? [closed] Asked 1 year, 1 month ago Modified 6 months ago Viewed 83k times

I'm a MySQL guy working on a SQL Server project, trying to get a datetime field to show the current time. In MySQL I'd use `NOW()` but it isn't accepting that. `INSERT INTO timelog ...`

Apparently the OpenJDK distribution for Java 21 is missing from Docker Hub. What happened? I'm certain OpenJDK 21 images existed in these paths before, as I've checked other ...

I'm trying to find an effective method of filtering Sharepoint lists based on the age of an item. In other words, if I want to find list items that are 7 days old, I should be able to build a filt...

Is there a PHP function that returns the date and time in the same format as the MySQL function `NOW()`? I know how to do it using `date()`, but I am asking if there is a function only for this. For

Now vscode is displaying visible image for svg files, Like this screenshot from release notes. `vscode svg screenshot` However, how to view or even edit the source of svg?
