PV laminates, Solar Films and PV Backsheet solutions for the photovoltaic industry.

Transparent Tedlar® films have been used for decades in protecting graphics and signage and photovoltaic backsheets.

They consist of a polymeric film with acrylic adhesive on one or both sides. These tapes can be applied at high speeds using automation equipment, ...

ACRYLITE®; Heatstop acrylic sheet is an IR-reflecting sheet that reflects a large portion of incident solar radiation to limit the amount of heat entering ...

Effective anti-glare films for solar modules from Phytonics. Avoid glare and increase comfort when using your solar system. Ideal for private ...

The results demonstrated that installing clear acrylic sheet will reduce the photovoltaic surface temperatures, enhance the performance, ...

Thin-film solar cells are a type of solar cell made by depositing one or more thin layers (thin films or TFs) of photovoltaic material onto a substrate, ...

Thin-film solar cells (TFSC) are manufactured using a single or multiple layers of PV elements over a surface comprised of a variety of ...

For solar and PV applications, Melinex®; 6428 is commonly laminated onto EVA as a substrate to form sturdy encapsulant films. New back sheet ...
