PV laminates, Solar Films and PV Backsheet solutions for the photovoltaic industry.

thickness of 1.2 mm to 60 mm are produced. The density can range from 600 kg/m³; to 1200 kg/m³; Boards with a density of more than 800 kg/m³; are usually known as HDF. These and ...

The objective of this lecture is to give an in-depth understanding of the physics and manufacturing processes of photovoltaic solar cells and related devices (photodetectors, photoconductors). ...

Double sided, adhesive foam tape bonds and seals photovoltaic laminate in the aluminum frames. Our mess-free PV module frame tape is more efficient than ...

As solar installations hit record numbers in Q1 2025, the choice of photovoltaic (PV) glue boards has become critical. These unsung heroes protect your solar cells from moisture, UV ...

Featuring a photovoltaic glue board with pet frosted laminate, it ensures durability and optimal performance. Originating from the Chinese mainland, this product meets CE and ROHS ...

STRATO SOLAR 's product range of encapsulants used in the Photovoltaic industry to laminate solar panels. The Photovoltaic product range includes proprietary chemical formulations that guarantee ...

Thanks to the advancements in solar technology, you can now opt for the so-called thin-film solar panel laminates designed to adhere to standing ...

We have made it easy to find the perfect adhesive tape solution for your solar panel needs. Whether you're mounting flexible or rigid panels, our product finder helps ...

This text provides an overview of the PhotoVoltaic lamination process. It examines the differences between various types of laminators, and ...
