---

The research presented in this article focuses on the practical implementation of a technology for constructing a slab foundation with an integrated sheet pile wall in compacted ...

The pile foundation construction technology of the photovoltaic power station mainly solves the problem existing in the prior art that the difficulty in leveling the pile foundation and the subsequent installation ...

This article delves into the critical realm of quality control in pile foundation construction, presenting a comprehensive exploration of both destructive and non-destructive testing methodologies.

With intelligent sensor fusion, AI-powered vision systems, real-time production data, and edge computing, the most advanced ...

In solar farm construction, the choice of pile driving techniques is crucial not only for ensuring the structural integrity of the installation but also for ...

Our team conducts geotechnical investigations to assess soil conditions and determine the most suitable foundation system for each project. If driven or ...

This paper aims to offer innovative ideas and methods to address the challenges of PV bracket pile foundations in desert gravel areas through the design of this new type of PV bracket...

The present invention relates to the field of photovoltaic apparatuses. Provided are a construction method for a pile foundation of a photovoltaic support, a pile foundation, and a photovoltaic support.

The common forms of photovoltaic support foundations include concrete independent foundations, concrete strip foundations, concrete cast-in-place piles, prestressed high-strength concrete (PHC ...

The present invention relates to the field of photovoltaic apparatuses. Provided are a construction method for a pile foundation of a photovoltaic support, a pile foundation, and a...
