RAI-3K-48ES-5G Models 3K ... Grid connection standard Safety/EMC standard G98 or G99, VDE-AR-N 4105/VDE V 0124, EN 50549-1, VDE 0126/UTE C 15/VFR:2019, RD 1699/RD 244/UNE 206006/ ...

Electrical installations must be done in accordance with the local and national electrical safety standards. Do not touch any inner live parts until 7 minutes after disconnection from the utility grid ...

On my inverter (RHI-3K-48ES-5G) the "low charge" level is 15% and when the batteries get that low they will be charged up to around 22% from the grid if there is no solar generation.

The instructions here are essentially the same for Solis hybrid solar inverters (e.g. RHI- (3-6)K-48ES-5G) and for Solis AC inverters (e.g. RAI-3K ...

Beta Series RAI-3K-48ES ENERGY STORAGE INVERTER 5G Features Uninterrupted power supply, 20ms reaction. Compatible with both lead-acid battery and li-ion battery. Compatible with any ...

There are two options in the Stg Mode Select: Time charging and Off-grid. A nother default mode is A uto mode (Maximize the self-consumption rate) which is not shown in the setting. Once the inverter is ...

RAI-3K-48ES-5G inverter requires a smart meter to measure the power flow at the grid connection point to achieve the self-use control algorithm. The smart meter and the communication cable are provided ...

RAI-3K-48ES-5G inverter requires a CT to measure the power flow to/from the grid. Wire diameter 6~12mm This will provide information to the RAI-3K-48ES-5G ...

RAI-3K-48ES-5G Retrofit inverter shows only 3 time slots for grid charge and 3 for discharge. Remove unused sensors from the integration when this device is selected.
