BEI Construction has the engineering, electrical and implementation expertise required on energy storage construction projects (BESS) and can deliver battery-based energy storage as part of your ...

We manage energy storage system construction with our end-to-end BESS solutions. Pursue net zero goals and reduce energy costs at your facility.

This document offers a curated overview of the relevant codes and standards (C+S) governing the safe deployment of utility-scale battery energy storage systems in ...

We have designed systems with pre-engineered metal, concrete tilt-up, outdoor enclosures, and custom racking design for minimizing footprint while maximizing ...

Our experts cover the entitlement and permitting considerations that impact a battery energy storage system project.

BESS facilities are useful for storing energy from solar plants and wind farms, which don't generate power all the time. They also provide backup power during outages and can respond quickly to ...

Establishes filing & submittal requirements, and outlines the approval process for lithium-ion, flow batteries, lead acid, and valve regulated lead-acid battery energy storage systems listed to UL 9540.

Our teams support standalone and solar-paired BESS from early development through construction, delivering optimized system layouts, power engineering, interconnection support, protection design, ...

This document is meant to be used as a customizable template for federal government agencies seeking to procure lithium-ion battery energy storage systems (BESS).
