The installed capacities in the main renewable technologies are about 3 GW in wind sources, representing a share in the total installed capacity of 16.39%, and about 1.6 GW in photovoltaic ...

Solar power in Romania had an installed capacity of 1,374 megawatt (MW) [1][2] as of the end of 2017. The country had in 2007 an installed capacity of 0.30 MW, which increased to 3.5 MW by the end of ...

Data and information about Solar power plants and their location plotted on an interactive map of Romania.

Solar PV accounted for 15% of Romania's total installed power generation capacity and 6% of total power generation in 2023.

The photovoltaic sector in Romania continues its upward trajectory, reaching 5 GW of installed capacity in 2024, with a growth of 1.8 GW compared to the previous year.

Romania has set an ambitious target to install over 8 Gigawatts of solar energy capacity by 2030, which is anticipated to constitute 24% of its gross ...

Romania is on track to install a record 1.7 GW of solar capacity in 2024, an expansion driven by government incentives and growing demand that ...

Romania added 2.5 GW this year to its total solar power capacity, 45% more than last year and roughly one third of the total capacity expected at ...

Solar PV is now the fastest-growing power source in the country. By the end of 2023, the cumulative PV capacity - distributed and utility-scale - reached 2.85 GW, generating over 2.5 TWh, which ...

Romania added 2.2 GW of solar in 2025, according to figures from the Romanian Photovoltaic Industry

Solar power generation capacity in Romania

Association (RPIA). The result marks a third consecutive year of growth in ...
