Photovoltaic (PV) solar accounted for 58% of all new electricity-generating capacity additions through the third quarter of 2025, remaining the dominant form of new electricity-generating ...

Solar Energy Information. Read the latest news and techniques for efficient solar photovoltaic power, new solar energy systems and more.

Worldwide solar and wind power generation has outpaced electricity demand this year, and for the first time on record, renewable energies combined generated ...

Almost 70 gigawatts (GW) of new solar generating capacity projects are scheduled to come online in 2026 and 2027, which represents a 49% increase in U.S. solar operating capacity ...

Of the 6.3 GW of new natural gas generation expected in 2026, 2.8 GW are expected to be combustion turbines, which are often used to compensate for the variability of renewable power.

Latest solar power news from Europe, Latin America, Sub-Saharan Africa, APAC, MENA and more. Stay updated on solar PV, solar energy, policy & projects.

EIA's latest monthly "Electric Power Monthly" report (with data through December 31, 2025), once again confirms that solar is the fastest-growing source of US electricity.

Is solar power going to take over the world? The past few years have seen a frankly astounding acceleration in the rate of its ...

The rapid expansion of solar capacity in recent years has made it the fastest growing source of new electricity generation. In 2024, global solar output rose by 28% (+469 TWh) compared ...

Join us at Solar Power World as we cover the world of solar news on technology, development and installation
