Solar power includes solar farms as well as local distributed generation, mostly on rooftops and increasingly from community solar arrays. In 2025, utility-scale ...

This research paper will investigate the present status of solar power generation in the United States with respect to the current solar photovoltaic (PV) in-installation status of 20 U.S. solar cities.

A U.S. Department of Energy National Laboratory Managed by the University of California

Almost 70 gigawatts (GW) of new solar generating capacity projects are scheduled to come online in 2026 and 2027, which represents a 49% increase in U.S. solar operating capacity ...

Explore the latest solar market insights and policy updates in all 50 states and Washington, D.C. All market data is current through Q3 2025. California leads as the top solar state. With over 54 GW of ...

The State of Renewable Energy dashboard tracks progress in solar, battery energy storage, wind, and EV adoption across the 50 states.

The solar sector is an incubator for job growth across the United States. Over the last decade, employment figures in the U.S. solar market have ...

According to the report, 77% of new solar capacity installed this year so far came from states across the South and Midwest; Texas, Indiana, Arizona, Florida, Ohio, Missouri, Kentucky, and...

This report summarizes the latest statistics on solar power capacity by state and highlights the top U.S. states in solar power generation.
