---

Our BESS solutions are designed to meet the specific needs of various applications, including residential, commercial, and industrial buildings, ...

This study analyses and anticipates the challenges that may arise in frequency stability in Vietnam's power system by 2030, ...

Among the key objectives were the upgrade of the power transmission and distribution system, acceleration of the roadmap to build a smart power system, ...

A representative from Viet Nam Electricity (EVN) also shared practical experiences in applying storage systems within the national power grid, contributing to greater flexibility and ...

The scientific workshop "Applying energy storage system and efficient technology for renewable energy projects in Vietnam" was organized by ...

Early pilots demonstrate practical applications: EVN Hanoi's 50 MW/50 MWh project highlights load-shifting and frequency-regulation ...

"Develop energy storage systems suitable for the increasingly high proportion of renewable energy to enhance the reliability and stability of the power system. Invest in building large-scale battery storage ...

Summary: This article explores Hanoi's evolving standards for energy storage charging pile equipment, including technical specifications, certification processes, and emerging opportunities in Vietnam's ...

This initiative combines solar power with hydrogen technology to create a 50MW hybrid energy system, positioning Hanoi as Southeast Asia's first major city adopting grid-scale hydrogen storage solutions.

The paper reviews the energy storage technologies in the world, their applications and prospects of their applications in Vietnam. Some characteristics of Vietnam's power system are discussed, especially ...
