Almost a decade later, American inventor Harry Reagan received patents for thermal batteries, which are structures used to store and release thermal ...

1981 - Isofoton is the first company to mass-produce bifacial solar cells based on developments by Antonio Luque et al. at the Institute of Solar Energy in Madrid.

The history of solar energy is an American success story. Since the creation of the first silicon solar cell 70 years ago, solar leaders have been innovating, improving efficiency, lowering ...

In 1973, the University of Delaware was responsible for ...

The sun doesn't shine all the time, and so we need to find effective ...

In 1958, the U.S. launched Vanguard 1, the first solar-powered satellite. Its radically new power system, made up of six solar panels, enabled it to remain in orbit for over six years. Other ...

1978 NASA's Lewis Research Center dedicates a 3.5-kilowatt photovoltaic (PV) system it installed on the Papago Indian Reservation located in southern Arizona--the world's first village PV system.

The history of energy storage systems including batteries. Learn what made it possible for us to offer home storage solutions to capture excess solar ...

The first solar cells were created using semi-conductor element like Cuprous Oxide (Cu_2O) and Selenium (Se) as ...

At the end of the 20th century, the invention of the lithium-ion battery revolutionized solar energy storage technology. Compared to lead-acid ...
