There are two types of air preheaters for use in steam generators in thermal power stations: One is a tubular type built into the boiler flue gas ducting, and the other is a regenerative air preheater. These may be arranged so the gas flows horizontally or vertically across the axis of rotation. Another type of air preheater is the regenerator used in iron or glass manufacture.

The generator of the power station needs to be preheated

Hold For Power Plants? We'll always need energy and especially electricity--a very versatile kind of energy we can easily use in many different ways--but that doesn't mean we'll always need power plants like the ones we have today. Environmental pressures are already forcing many countries to close coal-fired power plants that produce the greatest carbon dioxide emissions (resp... See more on explain that stuff)
