This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can ...

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that ...

Energy generation from renewables continued its steady upward trend, as a result of increases in solar generation (and despite a drop in wind and hydro generation).

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated ...

It examines the current state of solar power and related academic solar energy research in different countries, aiming to provide valuable guidance for researchers, designers, ...

China continued to dominate the global market, representing ~60% of 2024 installs, up 52% y/y. The rest of the world was up 11% y/y. The IEA reported Pakistan's rapid ...

OverviewSolar potentialHistorySolar photovoltaic powerConcentrated solar power (CSP)Government supportSee alsoFurther readingSolar power includes solar farms as well as local distributed generation, mostly on rooftops and increasingly from community solar arrays. In 2024, utility-scale solar power generated 219.8 terawatt-hours (TWh) in the United States. Total solar generation that year, including estimated small-scale photovoltaic generation, was 303.8 TWh.

Depending on the data, this can include standardizing country names and world region definitions, converting units, calculating derived ...
