In 1883, Fritts constructed the first solar cell by coating selenium with an extremely thin layer of gold. This simple yet revolutionary device marked the birth of photovoltaics - the conversion of light into ...

"When the modules were bought in 1980, Arco Solar was one of the world's largest manufacturers and had around 1 MW of annual production ...

Solar One combined solar thermal and photovoltaic (PV) systems in the first building-integrated photovoltaics (BIPV)* installation. The building, ...

In 1981, Paul MacCready built Solar Challenger, the first aircraft to run on solar power, and flew it across the English Channel from France to the U.K.

Overview
1930-1959
1800s
1900-1929
1960-1979
1980-1999
2000-2019
2020s
o 1932 - Audobert and Stora discover the photovoltaic effect in Cadmium selenide (CdSe), a photovoltaic material still used today.
o 1935 - Anthony H. Lamb receives patent US2000642, "Photoelectric device."
o 1946 - Russell Ohl files patent US2402662, "Light sensitive device."

We have put together a comprehensive history of the development of solar power. View our infographic timeline including key inventors and important milestones

In 1954, Bell Labs had developed the first true solar photovoltaic panel or solar cell panel using silicon. Invention of the solar panel can be ...

First Solar begins production in Perrysburg, Ohio, at the world's largest photovoltaic manufacturing plant with an estimated capacity of producing enough solar panels each year to generate 100 megawatts ...

In this article, we're going to look more closely at some of the oldest solar panel manufacturers in the world

The world s earliest photovoltaic panel brand

and how long they've been around. Let's ...

University of Delaware is credited with creating one of the first solar buildings, "Solar One," in 1973. The construction ran on a combination of solar thermal ...
