What Is Degradation in Solar?Is The Panel Operating at Full Capacity?What Is ShadingIs The Temperature Playing A Role in Load Capacity?What Does A Solar Controller do?Are Bad Connections The Problem?Do You Need to Determine The Source of A Drop-In Voltage from A Solar Panel?If your solar panel or array drops volts when under a load, the problem may be any number of issues. The best place to start is as follows:

1. Start with your testing equipment. Make sure it is working correctly and that the connections during testing are good. 2. Test the output at the solar panel and make sure that the panel is at peak capacity. ...See more on solvoltaics
