Radios used in radio communication, two-way radio, or land mobile radio (LMR) systems require stable DC power to perform at their best. To power your setup, you'll need a dependable AC ...

A 25 to 30 amp continuous rated supply is a good balance between cost and the power you'll likely need. Some good examples of switching supplies in the 25-30 amp range are the Samlex ...

13.8v and 30a is fairly standard for a shack. That radio should run from 11.73v to 15.87v but at 12v and 5 amps, you'll probably put too much demand on that little power supply. I use a switching power ...

Whether you're looking for a lightweight unit for camping or stashing in the truck for work, or a heavy-duty power station that will keep the lights on ...

Highjoule powers off-grid base stations with smart, stable, and green energy. Highjoule's site energy solution is designed to deliver stable and reliable power for telecom base stations in off-grid or weak ...

To cope with the problem of no or difficult grid access for base stations, and in line with the policy trend of energy saving and emission reduction, Huijue Group has launched an innovative base station ...

Mobile radios are typically designed to operate on a 13.8 volt electrical system, which is what you have when the car's alternator is charging the battery. The range is usually plus or minus ...

So, the mobile industry is considering migrating to higher voltages to distribute power to these antennas. Higher gauge cables may be used to ...

Stay powered on the go with the best portable power stations out there -- tried and tested by CNET's experts.
