Generation from all renewables combined - wind, solar, hydro, geothermal, and biomass - rose by 9.6% to a record 1,162,090 GWh, driven by surging generation from solar (+28%).

That expected growth is down from the record 37 gigawatts of solar power capacity that was added in 2024 and may dwindle further as some analysts believe that solar power may face ...

The California Independent System Operator (CAISO), the grid operator for most of the state, is increasingly curtailing solar- and wind-powered electricity generation as it balances supply ...

Solar installations are set to slow next year for the first time since the industry emerged as a global force two decades ago, as policy shifts and saturation in major markets temper demand.

The U.S. solar market slowed in Q2 2025 with installations down 24%. Policy uncertainty and regulatory delays pose risks to long-term solar growth.

A report released on Monday by the top solar trade association predicts that the number of new solar energy installations in the United States will decline over the next five-year period as the ...

The pace of new capacity of U.S. solar, wind and battery systems has slowed nationally and in key states this year, hurting clean energy sector ...

Dahlmeier explains, "Based on empirical evidence, the long-term global exponential trend for solar is unlikely to slow down before the end of the decade and probably not before 2034, if only due to the ...

More than 53GW worth of solar, wind and electricity storage projects ran into delays as of the fourth quarter of 2022, with solar accounting for nearly ...

On the good side, solar continued its run of astonishing growth, generating 35 percent more power than a year

Will solar power generation be slow

earlier and surpassing hydroelectric power for the first time.
