Global Wind Power Growth Accelerates in the First Half of 2025. The report can here be downloaded in pdf format.

Innovations in wind turbine design, consisting of larger and more efficient mills, floating offshore wind era, and AI-pushed predictive protection, are enhancing power output and decreasing ...

Apart from geography, the economics of wind are also determined by their turbine configurations. The optimal turbine configurations for the selected sites depend on their geography and wind ...

Considering the rapid growth of hybrid projects, the seasonal variability in renewable energy production, and the grid's limited capacity to handle excessive wind power, energy storage solutions, particularly ...

The Distributed Wind Market Report: 2024 Edition provides statistics and analysis of U.S. distributed wind energy for 2003-2023. Distributed wind turbines are connected at the distribution level of an ...

The analysis report also covers the market size and growth forecast for the wind turbine market across major regions, such as Asia-Pacific, North America, Europe, South America, and the ...

GWEC Market Intelligence provides a series of insights and data-based analysis on the development of the global wind energy market and global wind supply chain. The services include a market outlook, ...

In this paper, we compare the future (2030) market values, subsidy needs and total system costs (excl. intra-national grid costs due to congestion, redispatch and curtailment) of a more ...

This report analyzes the market concentration of the global wind turbine industry for the year 2024, utilizing the Herfindahl-Hirschman Index (HHI) calculated based on Original Equipment Manufacturer ...

In this paper, we compare the future (2030) market values, subsidy needs and total system costs of a more

Wind power market concentration system

concentrated versus a more diversified allocation of onshore wind turbines in Germany.
