A growing number of people who live near big wind farms are apparently reporting that they have developed a wide range of health problems, which have ...

Anemomenophobia, an extreme or irrational fear of wind turbines.

It's the irrational fear of windmills or wind turbines, often extending to a fear of their movement or the wind itself. This phobia is closely related to ...

Wind turbine phobia, or anemomenophobia, is an unreasonable dread of wind turbines. It is often the result of psychological trauma caused by a ...

At large scale, slowing down the wind by using its energy to turn turbines has environmental consequences. A group of researchers at Princeton University found that wind farms ...

When my husband and I were driving to Ottawa from Toronto, we passed by a large wind turbine farm. We were nowhere near them but as soon as I saw them I almost threw up.

While some people may not have the exact fear of wind turbines, others find them frightening and uncomfortable. The sheer size and silence of wind turbines make them seem like ...

Anemophobia is the fear of wind, and it can be triggered by seeing signs of wind outside. Kids often develop this fear when they experience ...

My first time I saw a wind farm going from Fort Wayne Indiana into Ohio I got a creepy feeling looking at it. This isn't the first time I've had a bizarre phobia though for I am terrified by the prism effect ...

Ancraophobia is never present at birth. The fear of wind most often arises as a result of a negative experience in the person's past. This experience may or may not be recalled in the conscious mind of the person but this

Wind turbines are afraid of wind

has been imprinted on the subconscious mind. Most often an anacraophobic person experienced a situation where the wind was blowing heavily and they found themselves afraid that the wind might destroy or kill them. This experience becomes linked with the wind, and is known as a "gen...
