---

The photovoltaic solar energy industry is developing rapidly. Zinc-aluminum-magnesium products have begun to be used in the photovoltaic industry, mainly in the columns and keel purlins of photovoltaic ...

We also have advanced production equipment and processes, and hold multiple international certifications. Our export products are sold in 20 countries and regions.

We provide innovative mounting solutions for any PV solar application including commercial, industrial, government, utility and residential applications. Our mounting system is ...

Shielded hot-dip galvanized magnesium aluminum ground photovoltaic bracket has good earthquake resistance, corrosion resistance and wind pressure resistance!

The Tangshan factory base will be officially put into production in 2023, with a production capacity of 5 million tons. New products include zinc-aluminum-magnesium coils and zinc-aluminum-magnesium ...

?Zinc aluminum magnesium brackets are suitable for occasions with high requirements on strength and corrosion resistance, such as large power ...

The quality and cost of the key support structure of PV mounts are critical to the performance and value of the entire PV system. Aluminum alloy, traditional carbon power station ...

Zinc, aluminum and magnesium coatings offer better corrosion resistance and less coating adhesion than conventional products, saving material and time. It has ...

The introduction of zinc aluminum magnesium photovoltaic bracket: Al, Mg, Si, and other alloying elements are added to the coating of super corrosion-resistant zinc-aluminum-magnesium ...
